

### Optimized value from the ground up.

We've taken decades of design experience to develop the ideal blend of ingenuity, quality, and affordability. We are proud to introduce the 7.5' Value Series stanchion featuring our G5 **RETRACTA-BELT®** mechanism. This unique 1 piece molded cap-to-clip cassette decreases costs and increases durability. We've also optimized the 7.5' belt with the proper spring-to-base balance to ensure that the post remains upright the entire length of belt extraction. Many longer belt products on the market will tip or lean before full belt extension, defeating their usefulness. The new low-profile cast iron base provides easy wheelchair accessibility and includes design details to ensure the post remains straight and your floors are free from scuffs and scratches.

### It's all about the base.

**Low profile base:** ensures safe and steady travel for wheelchairs & luggage alike.

**Exclusive EVERstraight® technology:** large diameter threaded steel base connection ensures the post remains straight for its lifetime.

**Scuff-proof ABS base cover.**

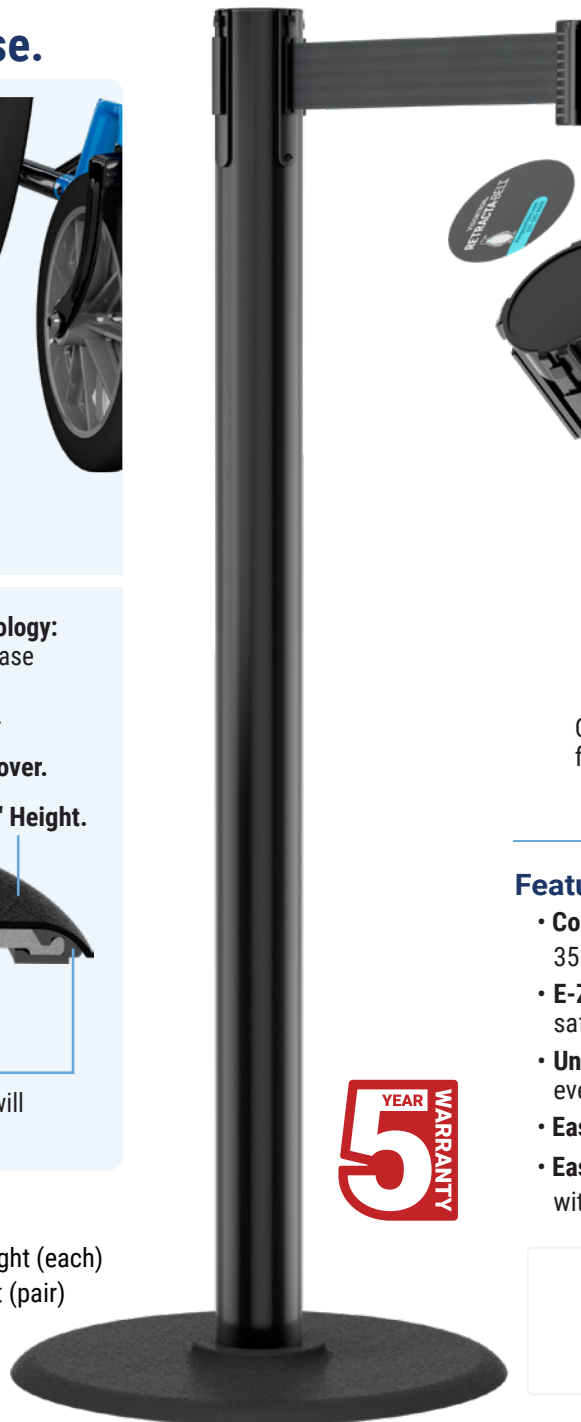

0.625" Height.

**Cast iron base:** construction is nearly indestructible.

**Full circumference floor protector:** integrated design with air flow technology will not peel off like competitors glued on pads.

### Specs

- 7.5' belt length
- 16.5 lbs. post weight (each)
- 39.5" post height
- 38 lbs. ship weight (pair)
- 2.5" post diameter
- 4" x 15" x 40" box
- 0.625" base height
- 14" base diameter

New **G5 RETRACTA-BELT®** technology

Unique 1 piece molded mechanism for simplicity and strength.

Optimized spring for reliable retraction.

### Features

- **Compact shipping:** 2 posts per box. 35% smaller than standard boxing.
- **E-Z Back® Brake design:** creates the safest post on the market.
- **Universal belt clip:** works with nearly every manufacturer's stanchion.
- **Easy assembly:** no tools required.
- **Easily attach signs and accessories:** with universal sign frame adapter cones.
