

## Designing the “New Queue”

The new normal is dictating changes in how we interact and go about doing business while keeping employees and customers healthy. Here are some tips to update or create a more guarded and distanced queue.

**1** Extend your queue when traffic is high with 30' belt stanchions equipped with 6' social distancing belt graphics and a **RETRACTA-WHEEL**® for quick, easy set-up.

**2** Build the perimeter of your queue with single line (shown) or ADA-compliant, dual line **RETRACTA-BELT**® stanchions, which accept the recommended accessories.

**3** Add social distancing reminder signage with Post Mount Sign Frames, belt graphics and Direction Dots™ floor decals.

**4** Mount accessories like mask, glove or sanitizer dispensers on the posts around the perimeter, taking advantage of the extra space in the corners.

**5** Incorporate sneeze guards by adding **Q-PANEL**® systems in between the lanes of the queue to keep people safe.

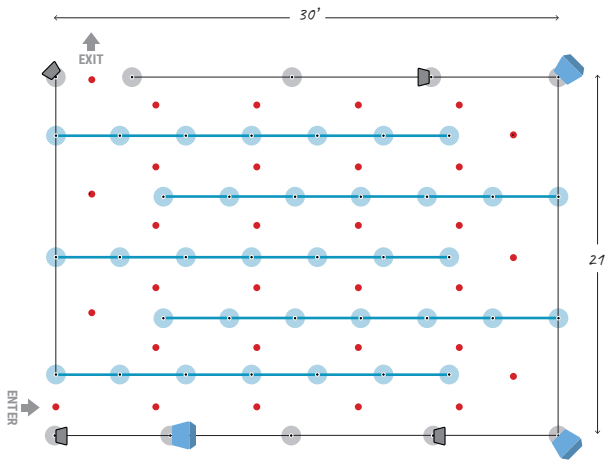

A People Guidance Pro is ready to help you find the right solution for your application.
