

HOW DO WE FUND OUR RETRACTA-CADE® QDB?

QDBs, or Quick Deployment Barricades, are quickly becoming an essential tool for departments around the country. They fill a need that other barricade types simply cannot support.

APPLY FOR AVAILABLE GRANTS

The best way to fund your QDBs is through existing grant programs. Use your available grant writers, or take advantage of our grant writing team, to assist with grants, such as:

- Homeland Security/UASI preparedness grants
- Your state's Department of Transportation
- Federal Department of Transportation
- National Institute of Justice

ADD TO NEW VEHICLE ORDERS

Add QDBs, such as the Retracta-Cade® QDB from Visiontron, as part of your standard equipment list to every new vehicle requisition. Depending on your fleet's vehicle model we recommend:

- 1-2 units for every cruiser
- 2-4 for command trucks
- A rack of up to 25 for fire, hazmat and emergency response vehicles

ADDITIONAL FUNDING METHODS

- Look to your departmental budgets
- Request QDBs from your city, county or state governments
- Hold community fundraisers earmarked for new equipment
- Solicit local companies and associations for in-kind sponsorship

For the safety of the public and the safety of your team, act now and start the process of getting QDBs for your departments.

WE ARE STANDING BY TO HELP YOU!

**CONTACT VISIONTRON AT 800-585-7750 AND ASK FOR THE QDB RESOURCE CENTER
