

Featured Product: Model SB800HDF-GV

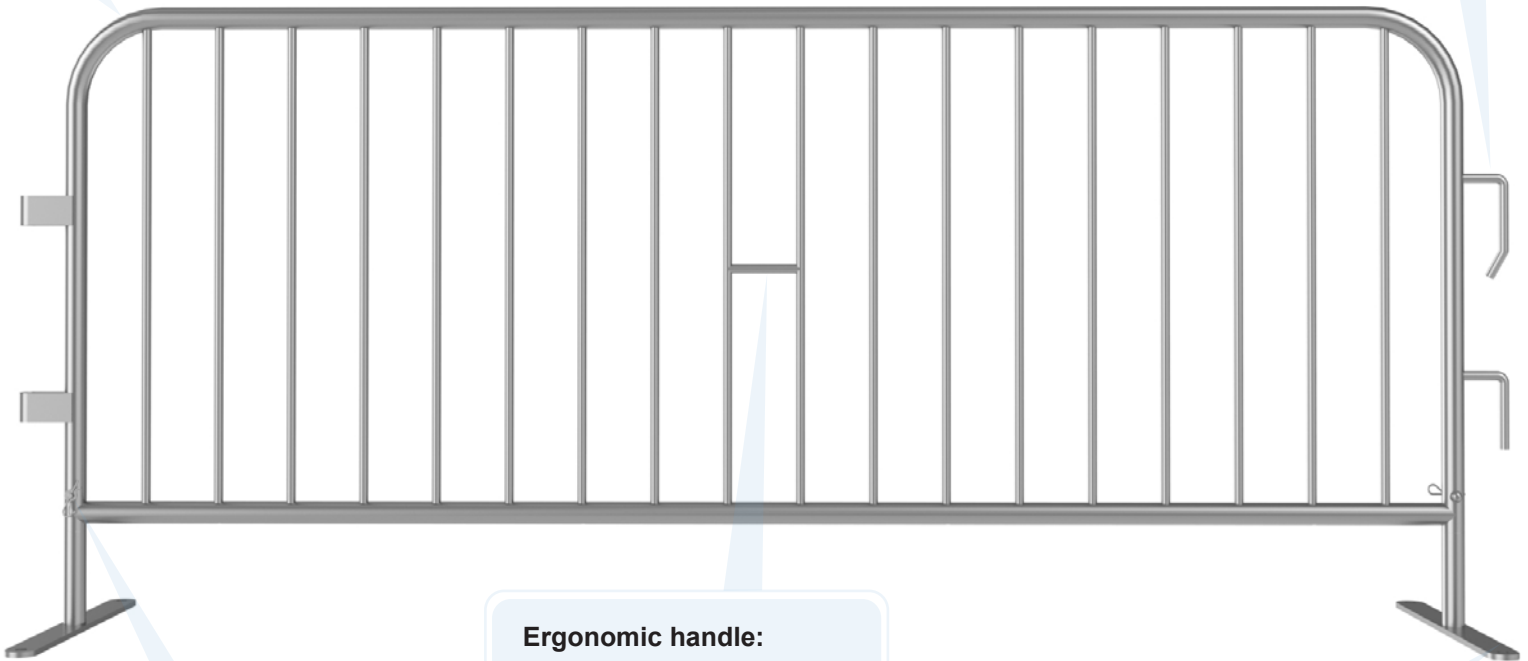

Heavy duty, secure and weatherproof crowd control barriers.

Uprights insert into frame before welding: strong and durable connection resists damage from broken welds.

Durable and secure hooks:

- ▶ Inserted and welded into frame at both inner and outer connection points which is stronger than a surface weld.
- ▶ 45° hook end is tamper-resistant to prevent an unauthorized person from lifting and separating the barriers.

Ergonomic handle:

Bar provides a comfortable and safe carrying handle.

No tools required to install or remove feet. Easily connect with quick pin and bolt.

Flat feet reduce tripping hazards and are ideal when Steel Barricades are used on a flat surface.

Two holes in each foot provide space for rubber floor protector pads (sold separately) or allow the unit to be permanently affixed to the ground.

Specs	
Frame Material	Hot-Dipped Galvanized Steel
Feet Material	Hot-Dipped Galvanized Steel
Overall Length	103"
